practical  
versatile

### Easy fastening of light loads

Loadfix from mamutec makes it easy for you to attach light loads to your vehicle, bike, boat, trailer, luggage rack or car interior, bike, boat, trailer, luggage rack, car interior enormously easy with the elastic tensioning element, which has a hooking possibility every 5 cm / 2 inches. The hooks can be adjusted according to the length, strength or length, strength or load tension.

### Multiple clamping elements for high flexibility

With two or more tensioning elements, you can achieve unimagined flexibility in fastening your your luggage properly and firmly. The elastic Loadfix tensioning elements can be looped together through the grid-shaped openings to form a practical mamutec luggage spider. This prevents the load and the individual the load and the individual elements on the load.

### High strength and clamping force

The Loadfix tensioning elements are made of high-quality, elastic, abrasion-resistant materials that have high strength and clamping force. Thanks to the grid-shaped openings the hooks on the clamping element can be moved according to the length required. The clamping element can be looped around a bar, hooked onto a hook or hooks or can be fastened in a variety of ways.
